EXPERIENCE

- **rtCamp** Remote
Senior Software Engineer Jul 2023 – Present
 - Contributed to **Google WebStories** (WordPress.org plugin, 200k+ installs) — introduced the audio sticker element and implemented editor pre-rendering, eliminating load-time lag entirely.
 - Shipped production features for **Google Chrome PSAT** — improved third-party cookie detection accuracy in the CLI and built key panels for the Chrome DevTools extension.
 - Co-developed **SnapWP**, an open-source headless WordPress framework; designed the package architecture and built the Next.js integration layer.
 - Built and maintained full-stack WordPress solutions for enterprise clients — custom PHP plugins, Gutenberg block themes, and REST/GraphQL API extensions.
 - Implemented LLM-powered site-wide vector search integrated into WordPress themes, cutting manual content discovery overhead for clients.
 - Authored comprehensive Puppeteer end-to-end test suites; delivered SEO-optimised, Core Web Vitals-compliant frontends.
- **Lana Health** Remote
SDE Intern Jul 2022 – Jun 2023
 - Built the full patient management dashboard in React — covering patient onboarding, in-admission education assignment, medication assignment, and medication tracking.
 - Designed and implemented the analytics section with custom graphing components to surface patient and usage metrics for clinical staff.
 - Built backend APIs using Dropwizard and Java to interface with FHIR-compliant health data systems.
- **Enalo** Remote
SDE Intern Feb 2022 – Apr 2022
 - Optimised existing transaction APIs by up to 30% and reduced PostgreSQL query time.
 - Implemented business banking interface applications using Python.

PROJECTS

- **Pinzo**: Crowdsourced rent transparency platform for Pune. Built on Cloudflare Workers + D1 + Hono with a React frontend; reached 300+ anonymous pins in the first week. Implemented AI-powered flatmate matching using vector embeddings.
- **autoMCC**: Autonomous AI agent to classify a company's Merchant Category Code from its website. Built a LangGraph reasoning agent with browser automation to crawl, extract, and map business content to regulated MCC codes.
- **Pulse**: Open-source P2P file sharing web app built with NodeJS, ExpressJS, SocketIO, and the WebTorrent protocol for fast cross-device transfers.

EDUCATION

- **Savitribai Phule Pune University** Pune, India
B.E., Information Technology; GPA: 9.2/10.0 2019 – 2023

SKILLS

- **Languages**: Python, PHP, Java, JavaScript (ES6), TypeScript, SQL
- **Frameworks**: React, Node.js, WordPress, Django, Flask, Hono
- **Platforms**: Cloudflare Workers, AWS, Azure
- **Tools**: Git, Docker, PostgreSQL, LangGraph

CERTIFICATES

- Python | Machine Learning | Azure Fundamentals (AZ-900)
